Catnaps design - A rivet is a
permanent mechanical
fastener.Before being
installed, a rivet consists of
a smooth cylindrical shaft
with a head on one end. The
end opposite to the head is
called the tail.On
installation, the rivet is
placed in a punched or
drilled hole, and the tail is
upset, or bucked (i.e.,
deformed), so that it
expands to about 1.5 times
the original shaft diameter,
holding the rivet in place.
